Education

Bachelor's Degree in Computer Science 2017 – 2021
Lebanese International University

Experience

Email Developer 2022 – 2023
Marketing science International

- Developed over 50 responsive email templates compatible with various email engines, including Outlook, Gmail, and other platforms.
- Ensured thorough testing of each email template to verify its compatibility and proper rendering across different email clients.
- Implemented best practices for email marketing, such as optimizing for deliverability, utilizing responsive design techniques, and incorporating compelling call-to-action elements.
- Successfully delivered high-quality email campaigns by meticulously testing each email before sending it to the company's email list.

Frontend web developer 2022 – 2023
Marketing science international

- Developed responsive websites and forms, ensuring optimal user experience across different devices and screen sizes.
- Created a survey form that collected valuable data and insights for the company's market research efforts.
- Utilized HTML, CSS, Sass and JavaScript to build interactive and visually appealing frontend components and features.
- Implemented best practices for frontend development, including clean and maintainable code, efficient performance, and cross-browser compatibility.
- Conducted thorough testing to ensure the proper functionality and usability of websites and forms across various browsers and platforms.
- Stayed updated with the latest frontend technologies and trends to continuously improve the quality and effectiveness of web development projects.

Portfolio

Portfolio Website

- Developed a visually appealing and interactive portfolio website using JavaScript, Sass, and Gulp.js.
- Implemented progressive web app (PWA) features, allowing users to add the website to their home screens for quick and convenient access.
- Ensured seamless cross-device functionality, making the website fully responsive on desktops, tablets, and mobile phones.
- Leveraged service workers and caching techniques to enable offline access, ensuring users can still browse the website even without an internet connection.

HTML/CSS

JavaScript

Responsive Design

Frontend Frameworks (React)

CSS Preprocessors (Sass, Scss)

Version Control (Git)

Cross-Browser Compatibility

UI/UX Design

Performance Optimization

Build Tools (Webpack, Gulp.js)

Progressive Web Apps (PWAs)

Single Page Applications (SPAs)

API Integration

Languages

Arabic

English

French

- Configured a manifest app that efficiently loaded all the necessary information, resulting in faster load times and an enhanced user experience.
- Employed object-oriented programming principles to automate tasks and improve code maintainability. Created reusable classes for components such as sliders and galleries, streamlining development processes.
- Utilized webpack to compile and bundle modules, JavaScript files, and other assets, optimizing performance and facilitating efficient code organization.
- Employed Babel with webpack to ensure compatibility with older browsers or environments, widening accessibility for users.
- Utilized Git and GitHub for version control, enabling seamless collaboration with team members and effective code management and tracking.
